At **Capital Oral & Facial Surgery Center**, we know missing teeth or slipping dentures can depress your quality of life. You may try to hide your smile or avoid interacting with others. And chances are, you can't eat the foods you love. **We can help.**

Our office specializes in restoring your natural smile with an array of options including dental implants for a single tooth, multiple teeth or implant dentures. Dental implants look and function just like your natural teeth. With them, you can once again enjoy talking and laughing with others, dining out with friends and indulging in the foods you love. **Where implants may not be feasible, we can recommend effective alternatives.**

For a limited time, we're providing a deeply discounted consultation for D.C. residents over the age of 50. A \$400 value, we're offering it to our D.C. neighbors for just \$99. **Reach out to us. We're here to help.**
